Milestone 6 Task Matrix:

Task	Completion	Dathan	Ethan	Jacob	Vincenzo	To do
Finalize Tour Mode	100%	0%	20%	40%	40%	Improve UI
Create a QR code for the .apk download	100%	0%	0%	50%	50%	N/A
Finalize Poster	100%	20%	20%	40%	20%	N/A
Conduct eval and analyze results	100%	40%	20%	20%	20%	N/A
User/Dev Manual	100%	25%	25%	25%	25%	N/A
Demo Video	100%	0%	50%	50%	0%	N/A

Task Report:

Task 1: Finalize Tour Mode

- During Milestone 6, the team finalized Tour Mode for FITARNA. This included integrating guided navigation waypoints throughout the FIT library, ensuring smooth transitions between stops, and verifying that AR overlays correctly displayed location labels and directional cues. The feature was tested across multiple devices to confirm stability before the final release.

Task 2: Create a QR code for the .apk download

- The team generated a QR code linked directly to the FITARNA .apk download to make installation as simple as possible for end users. The QR code was embedded in the project poster and website so that library visitors and event attendees could scan it with their Android devices and install the app without having to manually locate the file.

Task 3: Finalize Poster

- Throughout milestone 6, the team had several ideas for creating our poster board. However, we decided on one and completed our board. This board has two columns and details our Motivation, Project Goals, Implementation/Approach, and Software used.

Task 4: Evaluate and Finalize Results

- The team conducted a user evaluation of the FITARNA app, gathering feedback from testers on usability, navigation accuracy, and overall experience. Results were analyzed to identify any remaining pain points. The findings confirmed that the AR navigation functioned as intended and that users successfully navigated the library using the app.

Task 5: User/Dev Manual

- The team collaborated to write both a user manual and a developer manual for FITARNA. The user manual covers installation via the QR code and .apk, launching the app, using Tour Mode, and troubleshooting common issues. The developer manual documents the project architecture, AR framework integration, build instructions, and guidance for future developers who may extend or maintain the application.

Task 6: Demo Video

- Ethan and Jacob produced a demo video showcasing the full functionality of FITARNA. The video demonstrates launching the app, scanning AR markers within the library, using Tour Mode to follow a guided path, and highlights the Florida Tech-themed UI design. The video was recorded on a physical Android device to accurately represent the end-user experience.

Individual Report:

Vincenzo Barager:

- For milestone 6, I first ironed out some bugs in the app, including a visual bug that caused the screen to flicker. After fixing this bug, I updated the main menu. I also updated the pop-up logic to appear as white circles at medium distances, invisible from far away, and fully visible when near. I had also made it so they don't appear when the app is localizing. Then I finalize tour mode, adding the remaining stops.

Dathan Dixon:

- For milestone 6, I tested the app to report any bugs found. Once found I helped Vincenzo and Ethan fix any bugs, as well as giving feedback and suggestions for our poster board and project website.

Jacob Hall-Burns:

- During Milestone 6, I contributed to several final deliverables for FITARNA. I helped finalize the project poster by incorporating team feedback and organizing the content to clearly present our motivation, goals, implementation approach, and the software we used. I also created and updated the project website, including team contact information. In addition, I assisted with the evaluation and documentation effort and worked with Ethan to produce the demo video, which showcased the app running on an Android device and demonstrated Tour Mode, AR marker scanning, and the overall user experience.

Ethan Wadley:

- During Milestone 6, I completed the design portion of FITARNA. I edited the homepage to include colors and buttons that represented the school and aligned with Florida Tech's color scheme. I also helped Jacob and Vincenzo iron out bugs and finish stylizing the poster board.
